

VOXX Electronics Delivers Seatback System with Unlimited Content Capabilities

ORLANDO, FLORIDA – JANUARY 7, 2019 – LVCC – CENTRAL HALL BOOTH 13518-
[VOXX Electronics Corporation \(VEC\)](#), a wholly-owned subsidiary of [VOXX International Corporation](#) (NASDAQ: VOXX), announced today the introduction and availability of the dual monitor universal seatback entertainment system, with unlimited content access capabilities, full wireless remote control of the system and content selection from anywhere in the vehicle.

“In-Vehicle entertainment has been reborn with the first system to deliver what today’s consumers demand – true UNLIMITED content capabilities. Users can download their favorite apps, connect their favorite devices, and enjoy their extensive DVD collection, but best of all, they will have the ability to

fully control the seatback system without having to see actual monitors,” said Aron Demers, Senior Vice President, VOXX Electronics Corporation. “Apps developed for Android and Apple allow mom and dad in the front seat to access and fully control the system, which means no more pulling the car over or reaching around the seats.”

The system’s dual 10.1” monitors were designed to provide a larger viewing experience for each rear-seat passenger, as opposed to embedded headrest monitors that are restricted because of size or drop-down

monitors that limit the driver’s rear view. This system provides rear-seat passengers with complete access to any app available through the Google Play store, HDMI support to play content resident on their smart device, SD input for memory expansion, and USB input for charging in addition to media playback.
